Subject: Letter of recommendation for Doctor Erik Paulson

June 10, 2013

Dear Program Director,

It is my privilege to be writing this letter of recommendation for Erik Paulson as he pursues further his career in body imaging.

Erik has been a delight to work with over the past 4.5 years. I have been able to teach and watch him develop as a future radiologist and physician. He has been teachable and has responded appropriately to constructive criticism throughout his training. He maintains a pleasant attitude and has a consistent approach to being a physician daily.

As the chief resident, he has been reliable to entrust many tasks and has been able to relate to residents well given a leadership role. He has been instrumental in assisting me to improve the technical aspects of our residency here at OSU medical center with his advanced computer skills and by redesigning our website. These will most assuredly prove an asset to any program.

I have had many opportunities to observe and teach Erik over these past few years of his training. He has excellent hands and a good grasp on special orientation as it pertains to each modality he is working with. He has developed skills in cross sectional procedures that typically only interventional radiologists possess. He not only enjoyed performing procedures but would also volunteer to take additional procedures if we were short handed.

In all of residency, Erik has a perfect attendance record which is extremely rare in my experience. It is without reservation that I give Erik my highest recommendation for a position in your body imaging fellowship.

Sincerely,

A handwritten signature in black ink that reads "Jeremy Fullingim D.O." in a cursive style.

Jeremy Fullingim, D.O.
Program Director, OSUMC Diagnostic Radiology Residency
